## PROJECTS

### Scribe : A blogging app (Personal Project)

<https://github.com/Adityagaddhyan/Scribe.git> 📄

It is a blogging app that intends to let people speak for a change.

Tech Stack

- Built on Node.js, VanillaJS, express and HTML5. MongoDB database.
- Implements local authentication and session store for persistent sessions.
- RESTfull api and optimized back end make it reliable and fast.

### Freelance Project On Intraday Trading Database and calculator

SFC Advisor, Kolkata (sfcadvisor.com) 📄

07/2021 - Present

Built calculators for intra day trading projections and built a FO Bhaw Copy database that pulls the data automatically.

About project

- Hosted the web app on AWS.
- Tech stack used: NodeJS, MongoDB, Vanilla JS, express

Contact: Bharat Verma - [bharatverma19@gmail.com](mailto:bharatverma19@gmail.com)

### FOUR IN A LINE (personal project)

<https://fourinaline.herokuapp.com/> 📄

A simple and interesting game for 2 players.

About project:

- Built on vanillaJS and nodeJS using express and redis using PaperJs
- Makes AJAX request for every move for seamless experience.
- Spectrum CSS
- supports hassel free multi session.
- Github: <https://github.com/Adityagaddhyan/Four-in-a-line>

## SKILLS

Git

Data Structures

Linux

MySQL

NodeJS

DevOps (learning)

jQuery

Express

MongoDB

Express

Docker

AJAX

## TECHNICAL INTERESTS

### Competitive Coding

- Practicing competitive coding using C/C++ from last two years on online platforms. It really intrigues me to find the out of box solution for every new problem.

### Full Stack Web Development

- Full Stack developer. Created a few small apps like to-do list and fun score keeper. Also some big notable projects include freelance project of SFC advisor.

### Devops Engineer (learning)

- Proficient in Docker and git. Have moderate knowledge of jenkins and travis-ci and learning ci/cd tools constantly. I have indepth knowledge of SDLC and working in linux environment.

## FUN PROJECT

### Musical Board

[A oddly satisfying musical keyboard where playing music is as simple as pressing a key. This is built on PaperJS and howlerJS.](#)

## LANGUAGES

C/C++

Python

JavaScript

## PERSONAL INTERESTS

Books

Leadership

Economics

Badminton

History
